

Polyisocyanurate Foam Core Manufactured On-Line to Glass Fiber Reinforced Foil Facers on Each Side for Exposed Interior Applications

## Xci 286 Thermal Values

Thickness (inches)	Thickness (mm)	R-Value
1.0	25	6.3
1.5	38	9.5
1.6	41	10.1
2.0	51	13.0
2.5	64	16.0
3.0	76	19.0
3.5	89	22.0

*Thermal values as per ASTM C 518 in accordance with ASTM C 1289.*

## Description

Xci 286 is an energy efficient rigid insulation panel composed of a closed cell polyisocyanurate foam core manufactured online to 15 mil glass fiber reinforced foil facers. It can be used in new construction, or used for interior retrofit within existing buildings. Xci 286 is designed for exposed interior wall or ceiling use in commercial, residential, industrial, agricultural and metal building applications.

## Features and Benefits

- Polyiso offers increased R-value per inch vs mineral fiber, XPS or EPS options
- Designed for use in continuous insulation to assist in meeting the most current ASHRAE 90.1, IECC, IBC and IRC standards
- Passed NFPA 286 Corner Burn Test for walls or ceilings only, with or without joint treatment, allowing product to be left exposed on interior application without a thermal barrier up to 3.5" thick
- Passed UL 1715 with up to 8" for ceilings only
- Flame spread of <25 per ASTM E84
- Manufactured with NexGen Chemistry: Zero Ozone Depleting Potential (ODP); Contains no CFCs, HCFCs or HFCs; Virtually zero Global Warming Potential (GWP). Use of Xci products helps reduce the carbon footprint of buildings.
- Both sides reinforced foil, one side reflective, one side white, either side maybe left exposed

## Panel Characteristics

- ASTM C1289 Type 1, Class 1, Grade 2 (20 psi) or Grade 3 (25 psi)
- Available in 4' x 8' (1220mm x 2440mm) panels in thicknesses ranging from 1" (25mm) – 3.5" (89mm)
- Other lengths/widths available upon special request-- (for example: 10' or 12' board lengths)

## Applications

- Provides continuous insulation in exposed interior commercial and residential applications such as industrial buildings, pre-engineered metal buildings, agricultural buildings, parking garages, basements/attics/crawlspaces, and concrete and masonry wall assemblies
- Can be applied to walls and ceilings in residential attics and crawl spaces according to AC 12 Appendix B
- Provides interior and exterior sheathing options in tested NFPA 285 wall assemblies. Contact Hunter Xci for details.

## Codes and Compliances

- ASTM C1289
- IBC Chapter 26 and IRC Section R316.6
- NFPA 286 passed for exposed interior walls or ceilings applications
- Numerous NFPA 285 compliant assembly options
- Numerous UL 263 hourly designs
- DRJ Technical Evaluation Report 1402-01
- UL 1715
- Wisconsin Building Product Evaluation Report 201402-I
- California Bureau of Furnishings and Home Insulation
- California Code of Regulations, Title 24, Insulation Quality Standard License #TI-1420
- CCMC 13460-L
- CAN/ULC S-704 Type 1 Class 1

### LEED Potential credits for Polyiso use

- Energy and Atmosphere**
- Optimize Energy Performance
- Materials & Resources**
- Building Life-Cycle Impact Reduction
  - Environment Product Declaration
  - Material Reuse
  - 9% Pre-consumer Recycled Content
  - Construction and Demolition Waste Management
- Indoor Environmental Quality**
- Thermal Comfort

# Hunter Panels Xci 286

Polyisocyanurate Foam Core Manufactured On-Line to Glass Fiber Reinforced Foil Facers on Each Side for Exposed Interior Applications

## Typical Physical Property Data Chart

Property	Test Method	Value
Flame Spread Index (faced)	ASTM E 84	< 25
Smoke Developed (faced)	ASTM E 84	< 250
Compressive Strength	ASTM D 1621	20 psi* min. (138 kPa, Grade 2)
Impact Resistance (Janka Ball Test)	ASTM D 1037	40
Service Temperature		-100° to 250° F (-73°C to 122°C)
Recycled Content		9% pre-consumer

\*Also available Grade 3 (25 psi)

## Installation

- Xci 286 boards are lightweight and easily cut with a knife or saw
- Installs quickly and easily with mechanical or adhesive attachment
- Xci 286 is not a structural sheathing, always follow local codes for structural bracing
- Xci 286 must not be used as a nailing base for any other products
- Xci 286 is compatible with most construction grade adhesives, sealants, caulks, tapes, and spray foams

## Job-Site Storage

Good construction practice dictates that all insulations should be protected from moisture and direct sunlight during job-site storage. Pallets of Hunter Panels Xci 286 are double packaged in a UV resistant polyethylene bag. This moisture resistant package is designed for protection from the elements during flat-bed shipment from our factories to the job-site. Outdoor storage for extended periods of time requires waterproof tarpaulins and elevated storage above ground level a minimum of 2". Additionally, we recommend slitting the bundle packaging vertically down the center of the two short sides to prevent moisture accumulation within the package.

## Warnings and Limitations

Consult local building codes and insurance authorities regarding special applications or details required when using Xci 286 as an exposed product. Insulation must be protected from open flame. Hunter Panels will not be responsible for specific building design by others, for deficiencies in construction or workmanship, for dangerous conditions on the job site, or for improper storage and handling. Technical specifications shown in this literature are intended to be used as general guidelines only and are subject to change without notice. Call Hunter Panels for more specific details.

Xci 286 is a product that meets NFPA 286 requirements for interior exposed use without the need for a covering system. Surface anomalies on either side of the product are inherent in the manufacturing process. No aesthetic warranty is offered. If the product is going in a highly visible, trafficked area and a more finished surface is desired, it would be a subjective aesthetic decision to cover the product.
