

HUNTER

CLEAN EARTH™

Recycling Program

CAV-GRIP CONTAINER RECYCLING PROGRAM WITH CLEAN EARTH

Hunter Xci is part of an exclusive program with Clean Earth that provides a low-cost and eco-friendly disposal option for empty 40# CAV-GRIP cylinders. If you properly package and ship the minimum requirement to an approved disposal facility, Clean Earth will recycle them free of charge.

- **ALL CYLINDERS MUST BE DEPRESSURIZED PRIOR TO SHIPMENT.** Cylinders that do not have the friable disk or knockout valve removed will not be accepted.
- Cylinders must be properly packaged for shipment to the disposal facility.
- Shipments must contain at least 12 cylinders or a \$100 fee will be assessed. There is no maximum cap limit for the number of cylinders that can be shipped.

CYLINDER PREPARATION

Please note that ALL cylinders must go through the following procedure to be accepted at a Clean Earth recycling facility. **Use eye protection and impervious gloves.**

1. Follow the Cylinder Disposal directions on the Hunter Xci CAV-GRIP technical data sheet.
2. Once cylinders are empty and vented, carefully puncture the friable disc or knockout valve on the top of the cylinder(s).
3. Cylinders should then be packaged for shipment to the recycling facility. Cylinders are to be placed on a pallet and shrink-wrapped or placed in a Gaylord shipping box.

SHIPPING CONTAINERS TO CLEAN EARTH

Once the cylinder shipment has been properly prepared, shipping arrangements can be made with an LTL carrier. **Please note that all packaging, shipping arrangements, and transportation costs are the sole responsibility of the sender.**

CLEAN EARTH LOCATIONS

Address	City/State/Zip	Phone Number
1689 Shar-Cal Road	Calvert City, KY 42029	270-605-2105
